Saddled with a high trade deficit more than a decade after implementing a free trade agreement with Malaysia, India is set to begin a review process of the pact in a joint commission meeting to be held soon with its trade partner to expand and diversify the trade basket and make it more balanced, sources have said. "The Commerce Depart-

ment has sought inputs from various industry bodies and export promotion councils on the tariff and non-tariff barriers they face in Malaysia, the regulatory issues that are acting as hindrances and the measures that could help trade facilitation. These would be part of India's agenda in the joint commission meeting

for reviewing the India-Malaysia free trade pact. The idea is to increase exports and bridge the trade deficit," a source tracking the matter told businessline.

The free trade pact or (Comprehensive Economic Cooperation Agreement) between Malaysia and India was implemented in July 2011 covering trade in goods, services. investments and economic cooperation. In the area of goods in the both countries offered tariff liberalisation beyond the India-ASEAN FTA commitments on items of mutual interest for both.

TRADE DEFICIT UP However, like in the case of the India-ASEAN FTA, India's trade deficit increased with Malaysia after the implementation of the CECA. In 2010-2011, when the India-Malaysia CECA was signed, India's trade deficit with Malaysia was at \$2.65 billion with its exports valued at \$3.87 billion and imports at \$6.52 billion. The trade deficit widened to \$5.49 billion in 2023-24, with India's exports to Malaysia at \$7.26 billion and imports at \$12.75

The government has asked various sectors to list out products where tariffs in Malaysia are still high and could lead to greater market access if lowered.

"Information has also been sought on any non tariff barriers being faced by Indian exporters, for instance those related to sanitary & phytosanitary standards and technical barriers to trade," the source said.

## IRDAI asks insurance firms to open more physical branches

G Naga Sridhar Hyderabad

The Insurance Regulatory and Development Authority of India (IRDAI) has asked insurers to open more bricks-and-mortar branches alongside stepping up digital offerings. "Physical presence

through brick-and-mortar offices leads a long way in gaining customer confidence particularly in remote locations of the country. Adoption of technology infrastructure to reach out to customers enhances ease, a physical approach which can come in handy to reach the last mile," the regulator said in a master circular on operations.

To instil confidence in customers through visibility, the opening or closing of business units must be done judiciously, safeguarding the interests of policyholders, the regulator said.

Places of business should

be opened within a year from the date of approval, after which it would lapse.

### LIAISON OFFICE

To open a representative or liaison office outside India, the board of the insurer should approve all the related operational matters.

"The insurer should have appropriate arrangements to ensure that the policyholders' liabilities that arise out of foreign operations are adequately ring-fenced in order to protect interests of the policyholders residing in India," it said.

As per IRDAI data, there were 11,256 life insurance offices as on March 31, 2023, which is an increase of 196 from the previous year. Around 59 per cent of life insurance offices are in tier-1 centres with population of one lakh and above.

About 0.76 per cent are in tier-6 centres with population less than 5,000.

### **EXISTING OFFICES**

The public sector life insurer had offices in 688 of the 750 districts (92 per cent) in the country, whereas private sector insurers had offices in 604 districts (81 per cent).

Public and private insurers together covered 92 per cent of districts.

General and health insurers were operating from 9,917 offices against 10,775 offices as on March 31,

Overall, there is a decrease of 858 non-life insurance offices as compared with the previous year.

## Rupee likely to maintain the range

**Akhil Nallamuthu** bl research bureau

The rupee is up by 11 paise so far this week against the dollar as it ended at 83.43 on Tuesday. Therefore, the local currency has managed to recoup most of its losses it made in the second half of last week.

### WEEKLY RUPEE VIEW.

The decline in the dollar early this week supported the Indian unit. A notable positive development for rupee has been the current account deficit (CAD) number. The latest data shows that CAD, at \$23.3 billion, has narrowed to 0.7 per cent of GDP in FY24 compared with \$67 billion in the previous fiscal.

Another factor supporting the rupee is the capital inflows. According to National Securities Depository Ltd data, the net foreign portfolio investors flows over the past week is \$2.9 billion. The net in-

flows in June so far stands at \$3.5 billion. Thus, rupee remained flat despite the dollar index gaining 1.5 per cent over the past three weeks. As per the chart, the rupee manages to keep the range of 83-83.60

### CHART

The rupee, by closing at 83.43 on Tuesday, continues to trade within the 83-83.60 range. The broader price band has been 82.80-83.70. Therefore, it can establish a trend only when it moves out of this wider range. If the domestic currency surpasses the resistance at 82.80, it can appreciate to 82.50 and then to 82. On the other hand, a decline below 83.70 can open the door for a fall beyond 84, potentially to 84.20-84.30

The dollar index (DXY) can play a major role in deciding the path of rupee. DXY, currently trading at 105.50, has been on the rise over the last three weeks. Yet, it faces a resistance at 106.50. But a breakout of this can lead to a sharp rally, which can negatively impact the rupee. On the other hand, if DXY falls, it has a support at 104. But a breach of this can result in a deeper fall, probably to 102.70 or even to 101. In this scenario, rupee can be expected to appreciate to 82 or beyond.

### **OUTLOOK**

There are fundamental factors that are in favour of the rupee now. The Fed keeping the rates higher for longer is dollar positive. Overall, the forces on both sides can largely be expected to balance out, which means, rupee does not have the conditions yet to get out of the range within which it has been trading for quite some

## External debt up 6% to \$663.8 billion in FY24

Our Bureau Mumbai

India's external debt increased by about 6 per cent year-on-year (or by \$ 39.7 billion) to \$663.8 billion as at March-end 2024 against \$624.1 billion as at March-end 2023.

However, as a ratio to GDP, it declined to 18.7 per cent at end-March 2024 from 19 per cent at end-March 2023.

The country's external debt comprises loans, currency and deposits, trade credit and advances and debt securities. "Valuation effect due to

the appreciation of the US dollar vis-à-vis the Indian rupee and other major currencies such as yen, the euro and SDR (special drawing rights) amounted to \$8.7 billion.

US dollar-denominated debt remained the largest component of India's external debt, with a share of 53.8 per cent

lion at end-March 2024 over end-March 2023," per a RBI statement. Debt service (that is

principal repayments and interest payments) increased to 6.7 per cent of current receipts at end-March 2024 from 5.3 per cent at end-March 2023, reflecting higher debt service, it added. At end-March 2024,

long-term debt (with original maturity of above one year) increased by about 8 per cent y-o-y (or by \$ 45.6 billion) to \$541.2 billion over end-March

### COMPONENTS

Short-term debt on residual maturity basis (that is debt obligations that include long-term debt by original maturity falling due over the next twelve months and short-term debt by original maturity) constituted 42.9 per cent of total external debt at end-March 2024 (44.0 per cent at end-March 2023).

Short-term debt stood at 44.1 per cent of foreign exchange reserves (47.4 per cent at end-March 2023).

US dollar-denominated debt remained the largest component of India's external debt, with a share of 53.8 per cent at end-March 2024 (54.6 per cent as at March-end 2023). This was followed by

debt denominated in the Indian rupee (31.5 per cent vs 29.8 per cent as at March-end 2023), yen (5.8 per cent vs 5.7 per cent), SDR (5.4 per cent vs 6.1 per cent) and euro (2.8 per cent vs 3.2 per cent).

Loans remained largest component of external debt, with a share of 33.4 per cent (32.5 per cent as at March-end 2023), followed by currency and deposits (23.3 per cent vs 22.6 per cent as at March-end 2023), trade credit and advances (17.9 per cent vs 19.9 per cent) and debt securities (17.3) per cent vs 16.7 per cent).

### RBI appoints additional director on Bandhan Bank's board

Mithun Dasgupta

The Reserve Bank of India has appointed a director on the board of private sector lender Bandhan Bank, which will soon see a top management transition. The Kolkata-based lender's MD and CEO Chandra Shekhar Ghosh will retire on July 9, after spending nearly a decade at the helm.

In a stock exchange filing, Bandhan Bank said the Reserve Bank of India has appointed Arun Kumar Singh, a retired chief general manager at the central bank, as an Additional Director on its board for a period of one year from June 24, 2024 to June 23, 2025. Singh, aged 60 years, has working experience of almost 36 years in RBI. According to sources familiar with the development, the RBI has appointed the additional director on the bank's board to assist a "smooth" management transition as its MD and CEO's term is coming to an end shortly and the successor selection process is still on. On the succession plan, Ghosh, during an earnings call with analysts and investors, had said, "A search committee has been formed and it has appointed headhunters."

2024, GDP growth had touched 7.8 per cent, led by non-farm output and investment growth. The modest slowdown in GDP growth in April-June 2024 is mostly led by deterioration in industrial production, credit, freight traffic and government capital expenditure, according to DBS Group's Nowcast. Meanwhile, farm tractor, commercial vehicle sales and external

On the other hand, a decline below 83.70 can open the door for a fall beyond 84, potentially to 84.20-84.30 The dollar index (DXY) can

play a major role in deciding the path of rupee. DXY, currently trading at 105.50, has been on the rise over the last three weeks. Yet, it faces a resistance at 106.50. But a breakout of this can lead to a sharp rally, which can negatively impact the rupee. On the other hand, if DXY falls, it has a support at 104. But a breach of this can result in a deeper fall, probably to 102.70 or even to 101. In this scenario, rupee can be expected to appreciate

## External debt up 6% to \$663.8 billion in FY24

Our Bureau Mumbai

India's external debt increased by about 6 per cent year-on-year (or by \$ 39.7 billion) to \$663.8 billion as at March-end 2024 against \$624.1 billion as at March-end 2023.

Short-term debt stood at 44.1 per cent of foreign exchange reserves (47.4 per cent at end-March 2023).

US dollar-denominated debt remained the largest component of India's external debt, with a share of 53.8 per cent at end-March 2024 (54.6 per cent as at March-end 2023). This was followed by

### RBI appoints additional director on Bandhan Bank's board

Mithun Dasgupta

The Reserve Bank of India has appointed a director on the board of private sector lender Bandhan Bank, which will soon see a top management transition. The Kolkata-based lender's MD and CEO Chandra Shekhar Ghosh will retire on July 9, after spending nearly a decade at the helm.

In a stock exchange filing, Bandhan Bank said the Reserve Bank of India has appointed Arun Kumar Singh, a retired chief general manager at the central bank, as an Additional Director on its board for a period of one year from June 24, 2024 to June 23, 2025. Singh, aged 60 years, has working experience of almost 36 years in RBI. According to sources familiar with the development, the RBI has appointed the additional director on the bank's board to assist a "smooth" management transition as its MD and CEO's term is coming to an end shortly and the successor selection process is still on. On the succession plan, Ghosh, during an earnings call with analysts and investors, had said, "A search committee has been formed and it has appointed headhunters."

2024, GDP growth had touched 7.8 per cent, led by non-farm output and investment growth. The modest slowdown in GDP growth in April-June 2024 is mostly led by deterioration in industrial production, credit, freight traffic and government capital expenditure, according to DBS Group's Nowcast. Meanwhile, farm tractor, commercial vehicle sales and external
